ADRIATICA D.O.O.

Name of Ship	**M/T SAMPLE**
IMO No	**XXXXXXXX**
Name of Plan	**BIOFOULING MANAGEMENT PLAN**
Plan No	**ADRI-BMP-2026-R0**

ADRIATICA D.O.O.
Engineering & Technical Consultancy
Podgorica, Montenegro | info@adriaticadoo.me | www.adriaticadoo.me

FRONT MATTER

1. DOCUMENT CONTROL

Field	Information
Document Title	Biofouling Management Plan
Document Number	ADRI-BMP-2026-R0
Revision	0
Prepared by	Adriatica D.O.O.
Approved by	[Company Technical Manager Name]
Effective Date	15 March 2026
Next Review Date	15 March 2027

2. DISTRIBUTION LIST

Copy No.	Holder	Location
1	Master	Onboard
2	Company Technical Manager	Office
3	SMS Library	Onboard
4	Flag Administration	(if required)
5	Class Society	(if required)

3. AMENDMENT RECORD

Rev.	Date	Description	Approved by
0	15.03.2026	Initial issue	Tech. Manager

TABLE OF CONTENTS

1.3. Definitions	5
1.4. Plan Review and Update	7
2. VESSEL PARTICULARS	8
2.1. General Particulars	8
2.2. Principal Dimensions	8
3. ANTI-FOULING STRATEGY	10
4. DESCRIPTION OF VESSEL'S OPERATING PROFILE	11
5. DESCRIPTION OF VESSEL'S AREAS SUSCEPTIBLE TO BIOFOULING	14
6. OPERATION & MAINTENANCE OF VESSEL'S ANTI-FOULING SYSTEM	20
6.1. Timing of Operational and Maintenance Activities	20
6.2. Maintenance Procedures During Dry-Docking	21
6.3. In-Water Cleaning and Maintenance Procedures	22
6.4. Operation of Onboard Treatment Processes	28
7. SAFETY PROCEDURES FOR SHIP AND CREW	30
8. DISPOSAL OF BIOLOGICAL WASTE	33
9. RECORDING REQUIREMENTS	34
10. CREW TRAINING AND FAMILIARIZATION	36

APPENDICES

APPENDIX I	DESCRIPTION OF VESSEL'S ANTI-FOULING SYSTEMS
APPENDIX II	BIOFOULING RECORD BOOK FORM
APPENDIX III	DECISION SUPPORT TOOL FOR IN-WATER CLEANING
APPENDIX IV	TYPES OF ANTI-FOULING COATINGS
APPENDIX V	INFORMATION ON CURRENTLY AVAILABLE IN-WATER CLEANING TECHNOLOGY
APPENDIX VI	SPECIFIC CALIFORNIA STATE REQUIREMENTS
APPENDIX VII	SPECIFIC NEW ZEALAND REQUIREMENTS
APPENDIX VIII	SUPPORTING FORMS AND REPORTS
APPENDIX IX	QUICK GUIDE FOR CREW
APPENDIX X	RELEVANT INFORMATION

1. INTRODUCTION

1.1 SCOPE

This Plan has been developed pursuant to the 2011 Guidelines for the Control and Management of Ships' Biofouling to Minimize the Transfer of Invasive Aquatic Species, Resolution MEPC.207(62), adopted on 15 July 2011, and the US Ballast Water Management Rule, 33 CFR 151.2050(g), adopted on 21 June 2012.

The latest specific requirements of California State and New Zealand have been also taken into account (refer to Appendices VI and VII respectively) when developing this Plan.

The aim of this Plan is to provide effective procedures and practical guidance to the vessel's master, operator and owner and any other interested parties, on biofouling management measures in order to minimize the risk of transferring invasive aquatic species from ships' biofouling. It is important that these biofouling management procedures be effective as well as environmentally safe, practical and designed to minimize costs and delays to the vessel.

The management measures outlined herein is intended to complement current maintenance practices carried out within the Company.

This Plan is to be available for viewing on request by a Port State Authority and is written in the English language which is the working language of the crew.

Regulatory Cross-Reference Table

Regulation / Requirement	Applicable Section(s)
IMO Biofouling Guidelines (MEPC.207(62))	Section 3, Section 5, Section 6, Appendix II
IMO AFS Convention (2001)	Section 3, Appendix I
US Ballast Water Management Rule (33 CFR 151.2050(g))	Section 1.1 (Scope)
California Code of Regulations (Title 2, Div. 3, Ch. 1, Art. 4.8)	Appendix VI
New Zealand Craft Risk Management Standard (CRMS)	Appendix VII
ABS Guide for Biofouling Management (2020)	Section 4.2, Section 5, Section 6.1
DNV-RP-B101 (2019)	Section 4.2, Section 6.3

Note: This Plan has been developed pursuant to the IMO Biofouling Guidelines (MEPC.207(62) as amended by MEPC.378(80)).

1.2 GENERAL

Studies have shown that biofouling can be a significant factor for the transfer of invasive aquatic species. Biofouling on ships may result in the establishment of invasive aquatic species which may pose threats to human, animal and plant life, economic and cultural activities and the aquatic environment.

While the International Convention on the Control of Harmful Anti-Fouling Systems on Ships, 2001 (AFS Convention) addresses anti-fouling systems on ships, its focus is on the prevention of adverse impacts from the use of anti-fouling systems and the biocides they may contain, rather than preventing the transfer of invasive aquatic species.

The potential for invasive aquatic species transferred through biofouling to cause harm has been recognized by the IMO, the Convention on Biological Diversity (CBD), several UNEP Regional Seas Conventions (e.g., Barcelona Convention for the Protection of the Mediterranean Sea Against Pollution), the Asia Pacific Economic Cooperation forum (APEC), and the Secretariat of the Pacific Region Environmental Program (SPREP).
