FRONT MATTER

1. DOCUMENT CONTROL

Field	Information
Document Title	Ship Energy Efficiency Management Plan (SEEMP) – Part I
Document Number	ADRI-SEEMP-2026-R0
Revision	0
Prepared by	Adriatica D.O.O.
Approved by	[Company Technical Manager Name]
Effective Date	15 March 2026
Next Review Date	15 March 2027

2. DISTRIBUTION LIST

Copy No.	Holder	Location
1	Master	Onboard
2	Company Technical Manager	Office
3	SMS Library	Onboard
4	Flag Administration	(if required)
5	Class Society	(if required)

3. AMENDMENT RECORD

Rev.	Date	Description	Approved by
0	15.03.2026	Initial issue	Tech. Manager

1. INTRODUCTION

1.1 Scope and Objective

This Ship Energy Efficiency Management Plan (SEEMP) Part I has been developed to establish a framework for the continuous improvement of the vessel's energy efficiency. The objective is to reduce fuel consumption, CO_2 emissions, and operational costs while ensuring compliance with applicable regulations.

This Plan applies to all voyages and port activities. It covers:

- Identification and implementation of energy efficiency measures.
- Monitoring of fuel consumption, distance travelled, cargo carried, and CO_2 emissions.
- Internal auditing and annual review.

1.2 Regulatory References

This document complies with:

Authority	Regulation Reference	Description
IMO	MARPOL Annex VI, Resolution MEPC.346(78)	2022 Guidelines for the development of a Ship Energy Efficiency Management Plan (SEEMP) - Part I.
IMO	Resolution MEPC.213(63)	2012 Guidelines for the development of a SEEMP (as amended) for operational efficiency improvements.
IMO	MARPOL Annex VI, Reg. 22	Mandatory requirements for the IMO Data Collection System (DCS) – SEEMP Part II integration.
Flag State	[National Circulars]	Specific national requirements and additional technical mandates issued by the vessel's Flag Administration.

1.3 Definitions

CO_2: Carbon Dioxide.

EEXI: Energy Efficiency Existing Ship Index.

EEDI: Energy Efficiency Design Index.

Fuel Oil Consumption (FC): Total mass of fuel consumed by the ship, in metric tons.

IMO DCS: IMO Data Collection System for fuel oil consumption.

Noon Report: Daily report summarizing fuel consumption, distance, cargo, and operational hours.

SEEMP: Ship Energy Efficiency Management Plan.

Ship's speed: Speed through water (STW) or speed over ground (SOG) as recorded in bridge log.

Transport work: Product of cargo mass carried and distance sailed (tonnes · nautical miles).
